## Double segment sanding tool

The ARMINIUS double-segment sanding tool is perfect to sand stair treads and stringers. Due to the adjustability of the tool, workpiece thicknesses of 10 to 70mm can be sand with only one tool.

## APPLICATION EXAMPLES

## ARMINIUS handrail tools

The ARMINIUS handrail tools are suitable for sanding all variety of handrails on a wide range of machines. Curved handrails can also be sanded with a roller / follower on a spindle machine.

## ARMINIUS sanding segments

The single-segment assembly guarantees a quick and individual exchange of the sanding segments.

### YOUR BENEFITS

- All profiles can be sand with one tool
- Quick and easy exchange of profiles
- Cost savings through the standard profile program
- Available in a variety diameter and height
- Designed for long abrasive life
- Can be used For small quantities and occasional use
- Tools Available with a Shaft or bore style
- Abrasives in 3 price categories for different requirements
- No readjustment after changing the abrasive
